Foreign Trade is the exchange of capital, goods and services across international borders or territories. The pattern of foreign trade in a country changes along with its economic growth and development. The extent of foreign trade taking place depends upon the comparative advantage of a country. # PRICES|ANALYSIS

## ■ CONSUMER PRICE INDEX AND RATE OF INFLATION

Consumer Price Index (CPI) measures the average change in the retail prices of goods and services purchased and consumed by households. In Myanmar, the Central Statistical Organization produces the CPI and the rate of inflation monthly, with data collection from 82 townships across all states and regions.

The weights used in the production of the CPI are based on the levels of household income and expenditure as observed in the 2012 Household Income and Expenditure Survey.

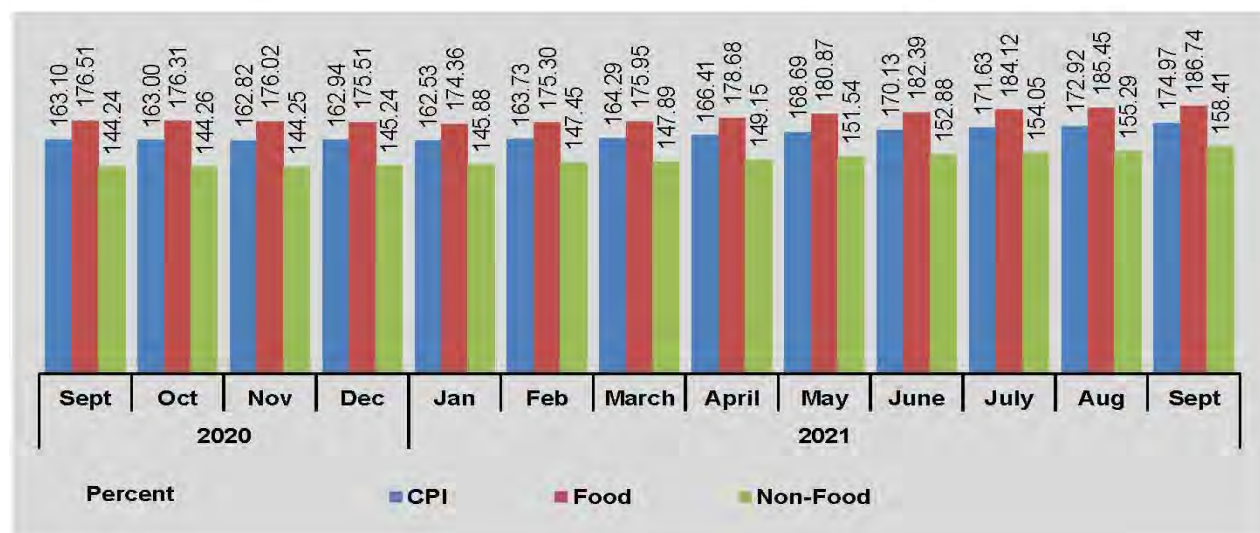

In September 2021, the CPI increased 2.05 points compared to August 2021, leading to an annual rate of inflation of 3.64% and year on year inflation of 7.28%. Relative to the 2012 base period, the index number for the food group was 186.74, the non-food group was 158.41 and overall CPI was 174.97.

CHAPTER 7  
**LABOUR AND EMPLOYMENT**

7

# LABOUR AND EMPLOYMENT | ANALYSIS

Labour and employment are critical factors in the production of goods and services. Thus, the improvement of the quality of the country's labour force and the efforts to make it more productive are crucial for the development of the economy. This chapter deals with the principal statistics of employment through Labour Exchange Offices and overseas employment in Myanmar. It also presents data on the distribution of new registrations, job vacancies and people who were placed into employment by Labour Exchange Offices in Yangon and other States/Regions. While the employment opportunities are greater in Yangon Region, there is also a higher concentration of job seekers in this region. In the whole country, the number of job seekers remains higher than the job opportunities.

## ■ EMPLOYMENT THROUGH LABOUR EXCHANGE OFFICES

The effect of the Coronavirus Disease 2019 (COVID-19) emergency is more evident in most recent monthly data (September 2021). In Yangon Region, new registrations decreased by 5.2%, vacancies notified, the number of submissions made for the vacancies and the number of people who were placed into employment decreased for each by 19%, 19.8% and 19.3% compared with the same month of 2020.

In other States and Regions, new registrations decreased by 37.6%, vacancies notified decreased by 53.5%, the number of submissions made for the vacancies decreased by 61.5% and the number of people who were placed into employment decreased by about 53.1% compared with the same month of the previous year.

In all States and Regions, the number registered, vacancies notified, the number of submissions made for the vacancies and the number of people who were placed into employment decreased by more than half during 2019-2020 and 2020-2021.

## ■ OVERSEAS EMPLOYMENT

Thailand, Malaysia, Korea, Singapore, Japan, the United Arab Emirates, and Qatar are the most popular overseas work destinations. In 2020-2021, Japan employed 95.9% of overseas workers, while Korea employed 3.1 percent. Between 2019-2020 and 2020-2021, overall overseas employment decreased by 97.3 percent. There are no overseas workers who have not been sent in September. From October 2020 to September 2021, licensed overseas employment agencies sent 4220 foreign workers to other nations.

## ■ LOCAL EMPLOYMENT

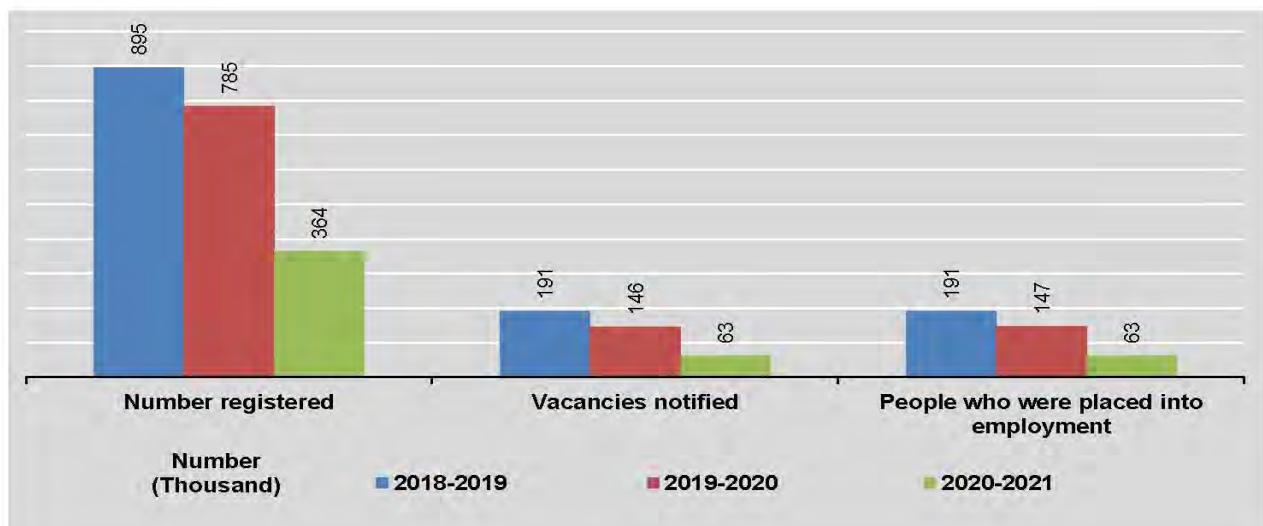

In September 2021, the number of people placed in the public sector through Labour Exchange Offices recorded for 14.7% of total placements, while the private sector recorded for 85.3%. The Yangon Region accounted for 60.8% of the workers, with the remaining 39.2% working in other States and Regions.

According to COICOP (Classification of Individual Consumption According to Purpose) Classification, weights and composition are grouped into twelve major categories of goods and services. For computing, the respective CPI groups are selected on the basis of their importance and representativeness. The computation of 2012 base CPI is based on 274 commodities which are commonly used by most of the households.

### ■ RETAIL PRICES OF SELECTED COMMODITIES

The Central Statistical Organization collects retail prices of about 274 items of selected commodities for computation of Monthly Consumer Price Index for the Union, 14 States and Regions, union territory and 3 major cities of Yangon, Mandalay and Naypyitaw.

The commodities prices are collected from 82 townships in all States and Regions.

## CHAPTER 4 | FINANCE

### ■ DOMESTIC INTEREST RATES

## ■ FOREIGN EXCHANGE RATES

Starting from 2012-2013, managed floating foreign exchange rate is used. Starting from 1<sup>st</sup> April 2013, the daily reference foreign exchange rates are obtained from Central Bank of Myanmar.

Since 5 February 2019, the Reference Exchange Rate of Myanmar Kyat equivalent to one unit of the US Dollar is computed and published by the Central Bank of Myanmar on its website every bank business day at 16:00.

The Reference Exchange Rate is calculated based on weighted average rate of the spot trades by the banks on the daily Foreign Exchange market during the calculation period (from 9:00 to 15:00 of the calculation day).

The Reference Exchange Rate is an indicative rate and participants in the foreign exchange market are not required to use it in their foreign exchange transactions. The Reference Exchange Rate of the previous bank business day can be used for settling customs obligations, accounting and statistical purposes.
